The sleek, ultra-modern designed KX-DT546 Digital Proprietary Telephone takes you to a new dimension in audio experience through excellent HD quality audio on every phone, combined with easy access to powerful supportive features and applications. A full set of control keys allow access to frequently-used operations such as transferring and conference calling. The Navigator Key provides speed and efficiency when programming names and telephone numbers, searching of quick-dial numbers and accessing many of the system features.

☞ 6-Line, 24-Character Graphical Display with Backlight

The LCD displays the various system information such as Caller ID, Date and Time, Call Log, Speed Dialling and Feature menus. The contrast level and back light settings are adjustable to adapt to different lighting conditions. The Multi-Language LCD Support allows the extension users to select from up to the five languages.

☞ 24 Flexible Outside Line (CO) Keys

Each extension user can program these keys for various functions such as CO Line appearance, Direct Station Selection (DSS) Key, One-touch Dial or feature setting, all of which help you achieve smoother call handling. Each key has a dual colour LED (red/green) that shows information such as line status, extension status or whether a feature is on or off.

☞ Speakerphone with HD Audio

The KX-DT546 is equipped with a speakerphone which delivers HD (High Definition) quality audio on every call due to the enhanced echo cancellation and an expanded acoustic chamber.

☞ Headset Jacks

The KX-DT546 provides a 2.5 mm headset jack as well as a 3.5 mm Electronic Hook Switch (EHS) controlled jack for maximum headset flexibility.

☞ Extra Device Port (XDP) / Digital XDP

The XDP jack on the back of the phone can have the same extension number as the phone itself, for convenient use of an answering machine or a cordless phone. It could also be a different extension number so you can use a modem or fax on one phone line while speaking on another line. Using D-XDP, you can connect a digital proprietary telephone for another extension user. With this feature it is possible to increase the number of digital sets without additional station cards.
